PROFESSIONAL SUMMARY

Since I started learning to code at 13, I've been strengthening my skills by working with mentors and senior software engineers. I'm a design-focused engineer that is eager to apply my adaptability, programming, and problem-solving skills to achieve company goals. I'm an exceptional worker with a record for exceeding expectations, leading young ones as well as peers, and delivering and developing complex projects.

WORK EXPERIENCE

WOZ U Pre-Apprenticeship

Aug. 2021 – Present

Software Engineer Pre-Apprentice

Frisco, TX

- Designing and configuring interfaces needed to transfer data between applications based on certain requirements.
- Designing, executing, and automating scenarios, scripts, and procedures.
- Developing software and integration flows that meet project requirements.

Paired Development

Apr. 2021 – Present

Software Development

Richmond, TX

- Pair programmed with Senior Developer to collaborate on improvements to application plugins for Obsidian.md.
- Improvements included but are not limited to increase in download speed, faster run-time, better user experience etc.

Diamond Health Care

Aug 2017 – Present

Office Secretary

Houston, TX

- Design tracking reports and client documentation methods that when implemented, increased productivity by **20% percent** for staff and also streamlined team processes.
- Restocked office supplies and retrieved files for staff. Kept files and digitized records organized for easy updating and retrieval by 10-person team.

KE Camps

June 2020
