Relevant Experience

Paired Development

April 2021 - Present

- Pair programmed with Senior Developer to collaborate on improvements to application plugins for Obsidian.md.
- Improvements included but are not limited to: increase in download speed, faster runtime, better user experience etc.

cMenu Toolbar

May 2021 - Present

- A custom text editor built from scratch that allows users to create and edit plain text files.
- The component was built using JavaScript, CSS, Browser APIs and Obsidian's application API.
- The interface handles common key shortcuts and was designed, built and is currently maintained by me. The component now has over 2,000 users.

Highlightr Application Plugin

April 2021 - Present

- A custom text editting component built from scratch that allows users to supplements annotations by allowing for highlighting text.
- The component was built using JavaScript, CSS, Browser APIs and Obsidian's application API. The component was designed, developed and is currently maintained by me.

MultiPix Search Tool

April 2021 - Present

- An image search tool built from scratch that allows users to search for, embed and download images directly into thier workspaces.
- The tool was built using TypeScript and multiple APIs such as Unsplash and Obsidian API. The interface taps into broser API's such as Navigator to allow for "copy to clipboard" functionality.
- The tool also functions as an image encoder via base64 encoding for ensure that images are future proof for users.
- The tool was designed, developed and is currently maintained by me.

Office Secretary @Diamond Health Care

August 2017 - Present // Houston, Texas

- Design tracking reports and client documentation methods that when implemented, increased productivity for staff and streamlined processes.
- Restocked office supplies and retrieved files for staff. Kept files and digitized records organized for easy updating and retrieval by 10 person team.
- Sorted and organized materials such as physical files, tracking spreadsheets and reports.
